How to burn CD’s, a step by step guide

1. Open Roxio. By pressing this icon on your desktop
   a. Or this one from the Start Menu

2. If you get this dialog box, Click the Do not show this reminder again box and then press the Remind me later button.
3. Choose the make a data CD button, and then the data CD project bar.
4. Drag and drop items to place on your CD.
5. When you are done, press the red Record button
6. Press the Start Recording button in the next window that appears:

7. When you are done, and go to close Roxio, you will get the following dialog box. Press the No Button.

Congratulations! You have a burned CD. If you wish, you may burn more to it until it is full. CD's can hold up to 700mb of Data. Repeating the above steps, you can keep writing to your CD until it is full.
