Weather Camp is a week-long day camp for students who are 11-15 years old.

During the week, campers use instruments to measure weather and conduct experiments. Field trips include a TV studio to watch live weathercasts.

Weather campers get to meet real scientists and learn more about science careers.

go.unl.edu/weathercamp
A whole week of weather and fun and learning.

History:
Our Weather Camp is part of a National Network of Weather Camps. Most activities take place at Hardin Hall, east campus of UNL with several field trips.

Organized By:
The School of Natural Resources
University of Nebraska–Lincoln
