**Project Description:** We are seeking a creel clerk to assist the Nebraska Cooperative Fish and Wildlife Research Unit (NE CFWRU) at the University of Nebraska—Lincoln (UNL) with a long term social-ecological study examining angler behavior and patterns. This project aims to identify how anglers influence fish communities and how these fish communities respond to angling. As part of this effort, a creel clerk will be hired to interview anglers in-person at Calamus reservoir, Nebraska.

The research-nature of this project requires that interviews occur on randomly selected days within each month (April-October). The assigned work schedule will vary from week to week. Interviews must be performed on week days (10 per month) and weekend days (6 per month), as well as on holiday weekends (July 4, Memorial Day, and Labor Day). Each day will consist of an 8-hour shift in either the morning or the afternoon. The position starts March 22, 2016 and runs through November 7, 2016. Mandatory training will occur March 22-25, 2016 in Lincoln, NE. This person will work closely with local fisheries biologists. Job duties include on site angler surveys and data entry. This position is temporary and is grant funded. Do not hesitate to contact us if you have questions about the position.

**Pay:** $11 per hour

**Qualifications:** Prospective employee is subject to all University of Nebraska—Lincoln hiring requirements including, but not limited to, driving and criminal background checks. Must possess a valid driver’s license and will be required to drive on the job. Preference will be given to individuals that have a reliable vehicle; mileage will be reimbursed. Previous creel experience is not required.

If interested, please submit a resume and three references to:
